SUBJECT INDEX

Cardiovascular reactivity, 237
  as a risk factor, 237
  cross-situational consistency of, 237, 240, 241
CNV, 1, 51, 55, 259, 264, 269
  and information processing, 1
  and P300, 1
  and speech motor programming, 259, 270
  and variable foreperiod, 1
  in stutterers and non-stutterers, 259, 260
  non-motoric, 1
Event-related potentials, 9, 23, 45, 51, 207, 259
  and CNV, 3, 14, 259
  and intelligence, 207, 218
  and stimulus match/mismatch, 24, 39
  and the E-wave, 3, 14
  N2 component of, 23, 37, 39
  N400 component of, 25, 38
  P300 component of, 45, 51, 56, 212
Habituation, 59, 65
  and dual-process theory, 62, 65
  comparator theories of, 59, 65, 66
  context-specificity of, 62, 65
  of orienting, 59, 60
N2, 23, 37, 39
  and expectancy mismatch, 25
  and multiple targets, 23
  and stimulus matches, 23, 39
  in the oddball paradigm, 23, 30
Pavlovian conditioning, 77, 79, 95, 113, 137, 153, 167, 185, 191, 195, 199, 203
  and avoidance learning, 167, 168, 171, 179
  and clinical disorders, 155
  and cognition, 138, 139, 153, 195, 205
  and contextual control of phasic responses, 95, 97
  and controlled processing, 114
  and fear-relevance, 115, 124
  and first interval responses, 85
  and human causal judgements, 79
  and nonconscious learning, 125, 187
  and phobias, 167, 175, 192
  and predictive validity in animal learning, 79, 80
  and predictive validity in human contingency judgement, 82
  and predictive validity in human conditioning, 84
  and S-R associations, 80, 137, 141, 144, 174, 186
  and S-S associations, 80, 142, 174
  and transswitching, 95, 185, 191, 200, 203
  and unconscious control, 113, 115, 124, 195
  orienting response account of, 140, 141
  preparatory response account of, 140
  with masked stimuli, 126
P300, 45
  and CNV, 51, 55
  and movement-related potential, 45, 51, 52, 56
Sleep, 245
  and performance, 245, 247, 252, 256
  and sleep disruption, 245
  and sleep inertia, 245, 246, 255
Stress, 227, 237, 240
  and cardiovascular activity, 227, 230
